Nathan Miller to Present TODAY 5pm Little Theater
 Oct 17, 5pm K-State Student Union, Little Theatre

pg **NATHAN MILLER**
 DATA, PERFORMANCE, AND THE MAINSTREAM

October 17 - Little Theatre - K-State Union - 5:00 p.m.
 While buildings remain costly, risky and time consuming endeavors, data is increasingly cheap, fast, and pervasive. A new data-driven process is allowing architects to realize new levels of performance in their business and for their clients. This lecture will explore the concept of "Data-Driven Design" and the opportunities to create value in architecture. Using a combination of real-world case studies and experimental prototypes, Nate will demonstrate uses of data for guiding design decisions, communicating insight to clients, and creating opportunities for innovation in the building industry.

Nate Miller is the founder of PECONING GROUND - a new business venture focused on data-driven solutions for architecture. He is a consultant, he has advised leaders and teams in some of the most reputable organizations in the building industry. Whether it's offering strategic insight or developing custom tools, Nate strives to help his clients leverage data to deliver value. Nate has authored numerous free and open source software tools that are widely used by professionals and academics. Nate continues to publish resources and experiments with computational technologies including Lunchbox, MyNanos, and Stingshot.

College of Architecture, Planning & Design honors four 2006 alumni

The College of Architecture, Planning & Design, or APDesign, at Kansas State University is recognizing five alumni for their success 10 years after their graduation from the university and APDesign programs.

The 2016 honorees are Corbin Keech, Chicago, IL; Drew and Melissa Marlow, Denver, CO; Katie Martin, Chicago, IL and Ryan McKay, Kansas City, MO.

They will be here October 27.

Best by design: Kansas State University APDesign programs shine in latest rankings by DesignIntelligence

The graduate programs in architecture, interior architecture and landscape architecture offered by Kansas State University's College of Architecture, Planning & Design are among the best in the nation, according to annual rankings by DesignIntelligence.

In addition, DesignIntelligence has selected two of the college's faculty members as among the most outstanding educators in the nation. Tim De Noble, dean of the college, and Stephanie Rolley, professor and head of the landscape architecture and regional & community planning department, were named to DesignIntelligence's 25 Most Admired Educators for 2016-17. Kansas State University is one of only three institutions - and the only public university - with two faculty members to make this distinguished list.

DesignIntelligence rankings for the college, which is also known as APDesign, tab it as the nation's No. 5 graduate program in landscape architecture and No. 7 graduate program in interior architecture. The graduate program in architecture is No. 18. Kansas State University is one of only four schools to be ranked in the top 20 on all three of DesignIntelligence's graduate program lists.
