## American Curves: Nature, Race and the Origins of the Modern Highway

Distinguished Lecture Series - Ekhtal Lecture  
**October 12, 2016, 4:00PM**  
K-State Union Forum Hall

When we associate the emergence of the modern expressway with the Eisenhower era and the Interstate highway program, but the origins of the modern motor road date back much further, to a series of parkways built in Westchester County, New York in the 1920s. The first of these, the Bronx River Parkway, was begun not as a road but as an effort to restore a terribly polluted waterway, led by one of the most problematic figures in American environmental history, Madison Grant. This talk will explore the roots of the modern American highway, examine the individuals who brought it into being and unpack the design ideals that helped shape an infrastructure that would change the world.

"We tend to associate the emergence of the American expressway with the Eisenhower era and the Interstate highway program. But the origins of the modern motor road date back much further, to a series of parkways built in Westchester County, New York in the 1920s. The first of these, the Bronx River Parkway, was begun not as a road but as an effort to restore a terribly polluted waterway, led by one of the most problematic figures in American environmental history, Madison Grant. This talk will explore the roots of the modern American highway, examine the individuals who brought it into being and unpack the design ideals that helped shape an infrastructure that would change the world."

**Attendance is expected.**

**Gregg Pasquarelli - Nelson Atkins Lecture, KCMO  
October 13 @ 6:00 PM - 7:00 PM**

**This extraordinary lecture, being presented in KC is open free of charge to the first 42 students to sign up! K-State transportation is provided! Please send an email to [tjackson@ksu.edu](mailto:tjackson@ksu.edu) to sign up as soon as possible.**

Join us for an inspiring evening with National Academy Fellow and board member of the Architectural League of New York, Gregg Pasquarelli. As a Founding Principal of SHoP Architects, a firm known for its diverse expertise and open-minded process, Pasquarelli has completed some of SHoP's most prominent projects, including the Bardays Center at Atlantic Yards in Brooklyn, New York. His catalogue of high-profile projects have helped earn the studio awards such as, Fast Company's "Most Innovative Architecture Firm in the World" in 2014, and the Smithsonian/Cooper Hewitt's "National Design Award for Architecture" in 2009.

Pasquarelli's impact on the field of architecture begins at the ground-level shaping a new generation of architects. He served as Saarinen Professor of Architecture at Yale University, and has also held teaching positions at Columbia University, the University of Virginia, Syracuse University, and the University of Florida. He challenges himself to create an understanding that innovative and beautiful architecture and technological proficiency are not mutually exclusive.

The Mary Atkins Lecture honors the legacy of Mary Atkins, a Kentucky schoolteacher who married a Kansas City businessman.

After developing a deep appreciation for the arts in her later years, she bequeathed her estate for the establishment of an art museum. The Nelson-Atkins resulted from the combined generosity of Mary Atkins and William Rockhill Nelson. The lecture series was established in 1995 to invite the finest artistic and cultural leaders to share their perspectives.

### APDESIGN BRAND MERCHANDISE

Get your APDesign merchandise at APD West this Wednesday, October 5 from 10am-4pm! Please note that we only can accept cash or checks!
